

[Draft Sample] GMP INNOVATION & PERFORMANCE METRIC REPORT					
Category	Metric	FY20	FY21	FY22	Trend
		(10/1/19-9/30/20)	(10/1/20-9/30/21)	(10/1/21-9/30/22)	
Capital Expenses	Total amount of capital spending	\$ [X]			
	Total amount of capital spending closed to plant	\$ [X]			
	Any exceptions to capital spending thresholds sought by GMP	See attached list (if applicable)			
Exogenous Costs	Total amount of exogenous storms costs	\$ [X]			
Power Portfolio	GMP's power supply emissions profile	[X] lbs CO2/kWh delivered			
	Percent of GMP's power supply that is carbon-free	[X] %			
	Percent of GMP's power supply that is renewable energy (as defined under 30 V.S.A. § 8002(21))	[X] %			
	Annual ISO Peak				
	GMP coincident load for ISO Peak				
	Winter peak - Vermont				
	GMP coincident load for Vermont winter peak				
	Summer peak - Vermont				
Distributed Generation	GMP coincident load for Vermont summer peak				
	Listing of interconnection requests, cost estimate of GMP upgrades for each request, current status of each request*	See attached list			
	Average days to interconnect ≤ 150kW DG systems	[X] days			
	Average days to interconnect 151- 499 kW DG systems	[X] days			
Distributed Energy Resources (DER)*	Average days to interconnect > 500 kW DG systems	[X] days			
	Percent of GMP load subject to dynamic curtailment or interruption	[X] %			
	Percent of GMP load with shared access by GMP directly or through aggregators	[X] %			
	Total aggregate MW capacity of behind-the-meter DERs connected to GMP shared access platform	[X] MW			
	Capacity of DER fleet that is on an incentive rate	[X] MW			
	Capacity of behind the meter DERs resources installed by third party suppliers connected to a GMP shared access platform	[X] MW			
	Number of storage systems connected to a GMP shared access platform	[X]			
	Capacity of storage systems connected to a GMP shared access platform capable of islanding individual customers or groups of customers (to extent known)	[X] MW			
EV	Number of storage systems that are capable of islanding individual customers or groups of customers (to the extent known)	[X]			
	Number of standalone Level 3 EV public charging stations interconnected (to extent known)	[X] MW			
	Number of EV home chargers connected to GMP shared access platform	[X]			
Other	Percent of customers receiving eBills	[X] %			
		[X] %			
	Percent of customers remitting thru autodraft or recurring CC				
	Percent of customers with a GMP online account	[X] %			
	Percent of customers enrolled in text alerts	[X] %			

* (not including solar PV systems)

° Statuses include:

- 1) in Fast Track Screening;
- 2) in Feasibility Study process (if requested);
- 3) in System Impact Study process;
- 4) in Facilities Study process;
- 5) Interconnection Agreement provided to generator;
- 6) interconnection agreement fully executed;
- 7) project online
