

SAVING JUST GOT CHEAPER

Green Mountain Power and Efficiency Vermont are committed to advancing clean energy solutions that help you save money. In 2018, Efficiency Vermont will provide the same level of service with a lower budget, resulting in an EEC rate adjustment of an 8.4% decrease for commercial customers, an 11.1% decrease for industrial customers, and a slight 1% increase for residential customers*.

CHANGE IN ENERGY EFFICIENCY CHARGE BY PUBLIC UTILITY COMMISSION

Since 2000, Vermont electric bills have included a separate Energy Efficiency Charge (EEC). Funds collected by the charge pay for energy efficiency services designed to save money by reducing Vermont's electricity needs. The purpose of this notice is to inform you of the EEC rates for 2018 as approved by the Public Utility Commission.

The EEC pays for an organization called Efficiency Vermont to provide energy efficiency services to most of the state. For more information, including technical advice, education, rebates and other financial incentives for homes, farms and businesses, contact Efficiency Vermont toll free at 1-888-921-5990 or at www.encyvermont.com.

Energy efficiency benefits Vermonters in two ways: first, using less electricity lowers the bills of individuals who take steps to reduce their power use; second, and more importantly, when statewide use goes down, it reduces electric utilities' total system costs, which would otherwise be paid by all electric customers through rates.

Summary of Energy Efficiency Charges for 2018

Customer Class	Current EEC rates	New EEC rates
RESIDENTIAL	\$0.01400/kWh	\$0.01413/kWh
COMMERCIAL	\$0.01192/kWh	\$0.01091/kWh
COMMERCIAL (with demand charge)	\$0.00772 per kWh plus \$1.2436/kW	\$0.00707 per kWh plus \$1.1383/kW
INDUSTRIAL (with demand charge)	\$0.00584 per kWh plus \$1.3875/kW	\$0.00522 per kWh plus \$1.2132/kW
UNMETERED STREET/SECURITY LIGHTS	\$0.0119/kWh	\$0.0109/kWh

New rates are effective February 1, 2018.

*Due to under-collections in 2017, the residential rate will increase by 1% despite Efficiency Vermont's decreased budget. For the average residential customer, this will amount 8 cents more per month.

If ambiance in a can lights your fire, we've got a perfect match.

Let's talk.

Recycling that brings comfort is a philosophy we share at GMP, and one that the heat pump delivers on daily. Instead of creating heat, the heat pump uses existing energy in the air to heat and cool your home, which saves energy and makes life cozy. If an upcycled lantern warms your heart, #VTFrugal, why not give GMP's heat pump program a try?
